To Atma Environmental- Glenn Berry

I Joe Comande from Comande Developments P/L being the director of the company, on or around February-March I called a environmental firm to have a job done at 1716 Sydney rd Campbellfield 3061 vic, which was to be a stage 1 and 2 soil site test. This particular firm managed to get stage 1 done and from that moment onwards I found it very difficult to get the rest of it done which was stage 2. After so many attempts to contact this firm 2 months went by so I decided to try someone else as the bank I was dealing with wanted the report urgently. I decided to go on the internet and I found Atma Environmental. I called them and they said that they had no problem getting to the site and doing the tests. It was the best thing I ever did. Atma were very responsive and in constant communication with me through e-mails and by phone. Atma carried out the stage 2 testing even earlier than we discussed which was even more beneficial for me. After the testing Atma e-mailed me the report and I also received the report on disc. I was extremely happy with the testing and its out come thanks to Atma's prompt and thorough testing it allowed me to get my finances sorted out quickly pushing forward with my refinancing. I highly recommend Atma Environmental to any one needing this type of work on commercial property as also the staff on their team were also very friendly and helpful.

Warm regards

Joe Comande

Director: Comande Developments P/L
