

Dear Glenn,

I refer to the recent Landfill Gas Risk Assessment that was completed by your company for my project. I found dealing with your staff very easy and assuring. They knew exactly what was required and put together a proposal for my approval.

The report was subsequently completed efficiently and professionally and most importantly within a timely manner.

Again, I was very impressed with the whole experience of dealing with ATMA and would not hesitate to recommend your professional consulting services to any prospective customer.

With kind regards,

Don Schepis
