Abbotsford 3067

Dear Rory,

Re: Tier 1 Landfill Gas Risk Assessment

I wish to acknowledge the high professional standards set by Atma Environmental in the successful completion of a Tier 1 Landfill Gas Risk Assessment for my property in Kingsville, Victoria.

The requirement for completion of a landfill gas assessment arose as a condition on a Maribyrnong City Council Planning Permit for an extension to residential dwelling, as my property was identified as being within 500 m of a former landfill.

The fixed fee cost provided by Atma Environmental was significantly less than estimates provided by others.

The final report was clear, comprehensive and completed within a short timeframe.

The report was submitted by council to EPA for review and authorisation, and successfully satisfied the planning condition without need for further comment or clarification,

I would happily recommend Atma Environmental to others, and have in fact already provided your details to several acquaintances dealing with the same planning requirement.

Yours faithfully,

Leo Wishart
